## How we can help to protect and improve the environment

Environmental pollution is a very serious problem nowadays. This pollution causes great damage to the environment and all living things. There are a lot of things we can do to preserve the environment. Factories should be moved to land outside cities. A great number of trees should be planted along the sides of the roads. Trees take in carbon dioxide and release oxygen, so they help to clean the air. The government should pass laws to reduce the number of cars on the roads. We have to spread awareness among ordinary people of the importance of preserving the environment. We must teach young children how to keep the environment clean. If we succeed in preserving (conserving) the environment, our children and grandchildren can enjoy the world we live in. Preserving the environment has become a very important issue in the modern world.

## The advantages and disadvantages of modern technology

Our life today is quite different from life fifty years ago. Life in the past was very simple and easy. In the past people used animals to go from place to place. Tourism is the second earner of foreign currency for Egypt. Millions of tourists come from all over the world to visit Egypt every year. They come to Egypt for many reasons. They want to enjoy the warmth of the weather and visit all ancient monuments.

They spend money on flights, hotels, museums, restaurants and transport. This provides our country with hard currency and provides jobs for the unemployed. Tourism is also important to make visitors know more about our history, culture, customs, traditions and language.

We should increase the number of people visiting Egypt every year by fighting terrorism which is tourism's great enemy. We have to be civilized and friendly to tourists. We must never eat food that smells bad or swollen canned food.

We should always wash hands before and after a meal. We must either boil tap water or cool it before we drink. In the end, as it has been said that "prevention is better than cure" so everybody should pay attention to his health.

## How we can help to protect and improve the environment

Environmental pollution is a very serious problem nowadays. This pollution causes great damage to the environment and all living things. There are a lot of things we can do to preserve the environment. Factories should be moved to land outside cities. A great number of trees should be planted along the sides of the roads. Trees take in carbon dioxide and release oxygen, so they help to clean the air. The government should pass laws to reduce the number of cars on the roads. We have to spread awareness among ordinary people of the importance of preserving the environment. We must teach young children how to keep the environment clean. If we succeed in preserving (conserving) the environment, our children and grandchildren can enjoy the world we live in. Preserving the environment has become a very important issue in the modern world.

## The advantages and disadvantages of modern technology

Our life today is quite different from life fifty years ago. Life in the past was very simple and easy. In the past people used animals to go from place to place. People died from many diseases which they could not cure. Today, thanks to modern science and technology, there are many inventions which have made man's life easier and more comfortable. Modern means of transport help us to travel long distances in a very short time. The progress in medicine has enabled us to find a cure for most diseases. We also have pure water and electric supply.

However modern technology has several disadvantages. The most noticeable disadvantage is pollution. Pollution is very harmful to man's life and can cause many diseases. Man now depends too much on machines. There are a lot of people who can't find jobs because we use machines to do most of our work. Many people nowadays suffer from stress and worry. Some people may have a nervous breakdown

## The person you admire most

The person I admire most is and regard as a hero is Professor Magdi Yacoub. He is a world- famous heart surgeon. He was part of the team which did the first British heart transplant operation. He was born in Egypt in Belbis in 1935. I admire him most because he is successful, perfect, hard-working and experienced. He is also very clever and good at his work. He has the qualifications and experience to do many great things. Although he retired as a surgeon in 2001, he is still researching new treatments. He is now the head of the Magdy Yacoub Heart Foundation, which is one of the largest charity organizations in Egypt. The foundation treats many Egyptian patients with heart problems, including small babies, free of charge . Professor Yacoub is a great example to be followed. He has showed me that you can do a lot of things even in your old age. I hope I will be a great surgeon like him. I love him very much. He deserves to be respected and loved

## Why tourism is important for Egypt.)

Tourism is the second earner of foreign currency for Egypt. Millions of tourists come from all over the world to visit Egypt every year. They come to Egypt for many reasons. They want to enjoy the warmth of the weather and visit all ancient monuments.

Tourism has many advantages for our country. It is a main source to increase national income and develop national economy. Tourists add a lot of money to the income of our country. They spend money on flights, hotels, museums, restaurants and transport. This provides our country with hard currency and provides jobs for the unemployed. Tourism is also important to make visitors know more about our history, culture, customs, traditions and language.

We should increase the number of people visiting Egypt every year by fighting terrorism which is tourism's great enemy. We have to be civilized and friendly to tourists. The government should set up modern hotels and offer accommodations at reasonable prices. Last, but not least, it is a must that we do our best to benefit from tourism

## prevention is better than cure

Health is a priceless treasure that completes our happiness and a gift of Allah. We cannot really enjoy our life if we are unhealthy. For an unhealthy person, life is no more than pain and suffering. He is a helpless member who cannot take part in the process of development. However, healthy people are always good members in their societies and help to achieve its welfare and progress. So, people should take care of their personal cleanliness as it is tremendously important in the prevention of many kinds of infections. In order to be healthy, we must be clean. We must never eat food that smells bad or swollen canned food.

We should always wash hands before and after a meal. We must either boil tap water or cool it before we drink. In the end, as it has been said that "prevention is better than cure" so everybody should pay attention to his health.

## The role of the Egyptian youth today

As a matter of fact, youth are the backbone of civilized nations. They play an important and vital role in the development in their societies. The prosperity of our country depends on their efforts. The responsibility of achieving progress lies on their shoulders. The country's ability to produce relies on the ability of youth. Youth can render fruitful services in all fields for the welfare of the Egyptian society. Students in schools and universities should study hard and concentrate on learning. Graduates should be ready to serve their country and do their best to protect it from dangers. Every employee and worker should do their duties efficiently. A teacher should bring up a good generation. A doctor must help relieve the pains of his patients. A baker should be conscientious and feed people healthy bread so that they would return the favour to him. Everyone should participate in building a prosperous society. Young men should make good use of their spare time. They should be enthusiastic, energetic, honest and loyal to their country. The government should do its best to look after young people. It should provide them with good education. It should let them share in making decisions. It should also give them loans and facilities to start new projects. Finally, youth can do a lot for this society, therefore they should be given due care.
